

JPAT 7 Installation and Activity Reports

Air Force

As of April 20, 2005

On November 15, 2004, the Deputy Assistant Secretary of the Air Force for Basing and Infrastructure Analysis published an interim report on BRAC Criterion 7. It contained individual reports for Military Department installations and DoD Activities/Agencies. The Military Departments, Agencies, and Activities continued to refine the data and the attached files provide individual installation and activity reports that incorporate changes received after the November 15 interim report was published.

The files are in Word format. There are four files—one for each Military Department and one for the DoD agencies and activities. Each contains this cover sheet, a table of contents, a reference sheet explaining the data elements included in the reports, and an alphabetized set of individual installation/activity reports.

Printing Reports. The files containing the individual reports are quite lengthy. Accordingly, caution should be exercised before printing an entire file. If printed copies of specific installation or activity reports are needed, locate the desired report(s) and print only the page range for that report. Page numbers are in the lower right hand corner of each page and are also shown at the bottom left corner of the Word document window. Note also that, in the electronic documents, the table of contents contains hyperlinks—when you click on an installation or activity name in the table of contents, Word will jump to the selected report.

In the event a decision to close or realign an installation or activity used an element of Criterion 7 as the discriminating factor, the responsible Service or Joint Cross Service Group was required to notify the Joint Process Action Team 7 Executive Agent Functional Representative (AF/DPXB) in writing. The Functional Representative for Joint Process Action Team 7 is Col Yvonne Schilz, 703-695-6113.

Reference Sheet

Demographics

Metropolitan Statistical Area (MSA) - An area defined by the Office of Management and Budget as a Federal statistical standard. An area qualifies for recognition as an MSA if it includes a city of at least 50,000 in population or an urbanized area of at least 50,000 with a total metropolitan area population of at least 100,000.

Military Housing Area (MHA) - MHA consists of a collection of zip codes within approximately 20 miles of the base or 1 hour commuting time that contain 80% of a base population that resides off base.

Rationale - Provides data for possible encroachment issues, level of medical care, partnering opportunities for emergency response, housing, airports and quality of life items associated with a major city.

Source - www.census.gov/population/estimates/metro-city/0312msa.txt

MHA Counties from OSD BAH disk

Calculations - No calculations were used in this paragraph.

Child Care

Local Community - Local Community is defined as all counties contained in the installation's Military Housing Area (MHA). If not in an MHA, the county where the installation/activity is located was used.

Accredited Child Care Center - Installations/activities were instructed to use www.NAEYC.org (National Association for the Education of Young Children).

Rationale - Gives a number of accredited child care centers available in the local community.

Source - www.NAEYC.org (National Association for the Education of Young Children)

Calculations - No calculations were used in this paragraph unless the installations provided data from multiple counties. If this occurred, the number of accredited centers was summed.

Example:

COUNTY	ACCREDITED CENTERS

B	2
C	6
TOTAL REPORTED	12

Cost of Living

Local Community - Local Community is defined as the Metropolitan Statistical Area (MSA) in which the installation is located. If not located in an MSA, a list of all counties contained in the installation's Military Housing Area (MHA) was compiled. If not in an MHA, the county where installation/activity is located was used.

Rationale - Determines relative cost of living in a local community. General Schedule Locality Pay provides a relative scale to compare local salaries with government salaries and BAH is an indicator of the local rental market.

Median Value of Owner-Occupied House - \$119,600

Median Household Income - \$41,994

COLA tables were used for installations outside of the 48 contiguous states

In-state tuition - www.armyeducation.army.mil/InState/StateSummary.htm

Calculations - If the installation resides in an MSA, then one answer is all the installation should have provided. If the installation is not in an MSA, then a weighted average was used to compute the Median Household Income and the Median House Price.

Education

Local Community - Local community is defined as a 20-mile radius from the perimeter of the installation/activity for all questions except institutions for higher education. A 30-mile radius was used for these questions.

Rationale - In-state tuition shows a relative cost for higher education for dependents. Pupil/teacher ratio provides an indicator of individualized attention for students. Student enrollment provides an indicator of capacity of local school systems. SAT I and ACT scores provide a national basis for comparison. High school graduation rate provides a way to measure the success of students in secondary schools. The number of vocational/technical, community, undergraduate, and graduate schools in an area is an indicator of the potential intellectual capital in the local community. In some cases, data may not have been reported due to school district policy or the school system may not use or track data such as the composite SAT I or the ACT scores. Installations/activities were required to document any problems in obtaining information from local school districts.

Local school districts for other education questions.

Calculations - In this section, entries for various school districts were summed to derive the reported values for each item below.

- Classroom capacity
- Students enrolled
- Students enrolled in the local school districts
- Students enrolled in the high schools

Weighted averages were used to derive the reported values for each item below.

- Composite SAT scores
- Composite ACT scores
- High school graduation rates

For Pupil-Teacher Ratios, a weighted average based on population is computed.

One example of how to calculate the High School graduation rate is given. Note that similar methodologies apply to any of the other items where weighted averaging occurred.

School District A: 1000 students (40% of all students for this installation)

School District B: 800 students (32% of all students for this installation)

School District C: 700 students (28% of all students for this installation)

SCHOOL DISTRICT	WEIGHTING	GRADUATION RATE	RATE CONTRIBUTION
A	.4 (40%)	60%	24%
B	.32 (32%)	60%	19.2%
C	.28 (28%)	90%	25.2%
TOTAL REPORTED	1.0 (100%)		68.4%

Employment

Local Community - Local Community is defined as the Metropolitan Statistical Area (MSA) in which the installation/activity is located. If not located in an MSA, then a list of all counties contained in the installation's Military Housing Area (MHA) was used. If not in an MHA, the county where installation/activity is located was used.

Rationale - Unemployment and job growth rates provide relative indicators of job availability in the local community.

Source - www.bls.gov/lau/lausad.htm or <http://www.bls.gov/cps/cpsatabs.htm>

Calculations - If unemployment rates were reported for multiple counties, a weighted average was calculated. For job growth rates, job counts were summed across multiple counties, if necessary, and rates were then derived as follows:

Assume the installation provided the following numbers for the number of jobs (JOBS).

	1998	1999	2000	2001	2002	2003
JOBS	10	12	14	16	18	10
CHANGE	NA	+2	+2	+2	+2	-8
PERCENT CHANGE	NA	2/10=20%	2/12=16.7%	2/14=14.3%	2/16=12.5%	-8/18 = -44.4%
REPORTED	NA	20%	16.7%	14.3%	12.5%	-44.4%

Housing

Local Community - Local Community is defined as the Metropolitan Statistical Area (MSA) in which the installation/activity is located. If not located in an MSA, then a list of all counties contained in the installation's Military Housing Area (MHA) was used. If not in an MHA, the county where installation/activity is located was used.

Rationale - Provides relative measure of availability for off-base housing for sale or rent.

Source - www.census.gov/

Calculations - For installations reporting only MSA data, no calculation was done. Otherwise, individual entries were summed for each installation for the following reported items:

- Vacant housing units available
- Number available for rent
- Number for sale

Medical Providers

Local Community - Local Community is defined as the Metropolitan Statistical Area (MSA) in which the installation/activity is located. If not located in an MSA, then a list of all counties contained in the

installation's Military Housing Area (MHA) was used. If not in an MHA, the county where installation/activity is located was used.

Rationale - Provides an indicator of medical care for military and DoD civilians in the local community.

Sources - US Census Bureau. Per the direction of USAF/SG letter, June 30, 2004, Quality Resource Systems, Inc., a contractor, was directed to use the American Medical Association, Physician's Professional Record, December 31, 2003 and Health Forum, LLC, an affiliate of the American Hospital Association, AHA Annual Survey Database, Fiscal Year 2002 to determine numbers of physicians and beds

Calculations - Raw numbers were reported by the installations/activities for both physicians and beds into a ratio of physicians (or beds) per person for the MSA. The computer summed the number of physicians (or beds) for all counties. Then the computer pulled the MSA population (or the sum of the MHA populations if the base is not in an MSA) from the existing database. Finally, the ratio is computed by dividing the population by the total physicians (or beds).

Safety/Crime

Local Community - Local Community is defined as the Metropolitan Statistical Area (MSA) in which the installation/activity is located. If not located in an MSA, then the state average was used. Either number is per 100,000 population.

Rationale - The crime index is an overarching statistic that covers eight crimes that include both violent crimes against persons and crimes against property and provides a measure of relative safety in the local community.

Source - <http://www.fbi.gov/ucr/cius02/html/web/offreported/02-table02.html> for state FBI information, Table 5, State, 2002, http://www.fbi.gov/ucr/cius_02/xl/02tbl05.xls

Calculations - If the installation reported MSA data, then the FBI rate was already calculated on the website, and no further work is needed. If the installation is not in an MSA, then state data is reported. State data is already given as an appropriately formatted rate on the FBI website.

Transportation

Rationale - Distance to an airport shows convenience and availability of airline transportation. Public transportation shows potential for members and DoD civilians to use it to commute to/from work under normal circumstances and for leisure.

Source - Defense Table of Distances, <http://dtod1.mtmc.army.mil/default.asp?help=authorized>
Local travel claims office

Calculations - No calculations were used in this section.

Utilities

Local Community - Local community is defined as a 20-mile radius from the perimeter of the installation/activity.

Rationale - Identifies infrastructure limitations in a local community's ability to receive 1,000 additional people.

Source - Local utility companies

Calculations - No calculations were used in this section.

Air Reserve Personnel Center (ARPC), CO

Demographics

The following tables provide a short description of the area near the installation/activity. Air Reserve Personnel Center (ARPC) is within Denver, CO, the nearest city with a population of 100,000 or more. The nearest metropolitan statistical area (MSA) is

Cost of Living

Cost of Living provides a relative measure of cost of living in the local community. General Schedule (GS) Locality pay provides a relative scale to compare local salaries with government salaries and Basic Allowance for Housing (BAH) is an indicator of the local rental market. In-state tuition is an indicator of the support provided by the state for active duty family members to participate in higher-level education opportunities. For median household income and house value, the basis of the data (either MSA or number of counties in the MHA or the county of the installation) is indicated.

Median Household Income	(US Avg \$41,994)	\$51,191	Basis: MSA
Median House Value	(US Avg \$119,600)	\$176,600	
GS Locality Pay	("Rest of US" 10.9%)	16.7%	
O-3 with Dependents BAH Rate		\$1,464	
In-state Tuition for Family Member		Yes	
In-state Tuition Continues if Member PCSs Out of State		No	

Education

This attribute defines the population in local school districts and identifies capacity. The pupil/teacher ratio, graduation rate, and composite SAT I/ACT scores provide a relative quality indicator of education. This attribute also attempts to give communities credit for the potential intellectual capital they provide.

This document may contain information protected from disclosure by public law, regulations or orders.

NOTE: "MFR"--means a Memorandum For Record is on file at the installation/activity/agency to document problems in obtaining the required information. Reasons for not being able to obtain information may be that the school district refused to provide the information or the school district does not use or track the information. For each entry, the number of school districts for which data are available of the total number of school districts reported, and the number of MFRs is indicated.

Housing

This attribute provides an indication of availability of housing, both sales and rental, in the local community. Note: According to the 2000 Census, Vacant Sale and Vacant Rental Units do not equal total Vacant Housing Units. Vacant housing units may also include units that are vacant but not on the market for sale or rent. For each entry, the basis of the data (either MSA or number of counties in the MHA or the county of the installation) is indicated.

Total Vacant Housing Units	31,394	Basis: MSA
Vacant Sale Units	6,753	
Vacant Rental Units	13,380	

Medical Providers

This attribute provides an indicator of availability of medical care for military and DoD civilians in the local community. Safety/Crime

The local community's Uniform Crime Reports (UCR) Index for 2002 per 100,000 people and the national UCR based on information from the Federal Bureau of Investigation (FBI) for 2002 is provided. The basis of the data (either MSA or state) is indicated.

Local UCR	4,821.0	Basis: MSA
National UCR	4,118.8	

Transportation

Distance to an airport shows convenience and availability of airline transportation. Public transportation shows potential for members and DoD civilians to use it to commute to/from work under normal circumstances and for leisure.

Distance from Air Reserve Personnel Center (ARPC) to nearest commercial airport: 20.0 miles

Is Air Reserve Personnel Center (ARPC) served by regularly scheduled public transportation? Yes

Utilities

This attribute identifies a local community's water and sewer systems' ability to receive 1,000 additional people.

Does the local community's water system have the ability to meet an expanded need of an additional 1,000 people moving in the local community? Yes

Does the local community's sewer system have the ability to meet an expanded need of an additional 1,000 people moving in the local community? Yes

Education

This attribute defines the population in local school districts and identifies capacity. The pupil/teacher ratio, graduation rate, and composite SAT I/ACT scores provide a relative quality indicator of education. This attribute also attempts to give communities credit for the potential intellectual capital they provide.

NOTE: "MFR"--means a Memorandum For Record is on file at the installation/activity/agency to document problems in obtaining the required information. Reasons for not being able to obtain information may be that the school district refused to provide the information or the school district does not use or track the information. For each entry, the number of school districts for which data are available of the total number of school districts reported, and the number of MFRs is indicated.
